Wi-Fi 7
latest-generation, mesh-ready Wi-Fi

10GbE+
backbone speeds for heavy data

FAST

Ultra-low latency, high-bandwidth infrastructure. Pages load instantly and video calls stay smooth.

RELIABLE

Redundant links and automatic failover keep you online, even when a line goes down.

SMART

Cloud-managed, AI-driven systems let us monitor and fix issues remotely, often before you notice.

CORE INFRASTRUCTURE & CONNECTIVITY

Business Fibre & Wireless Internet

Fast internet that stays on, even if your main line goes down.

Symmetrical business fibre with guaranteed throughput and robust SLAs, paired with a business-grade wireless link and secondary automated link failover.

Wi-Fi 7 & Mesh Wi-Fi

Strong Wi-Fi in every corner, with a separate network for guests.

Seamless multi-point deployments up to Wi-Fi 7 mesh technology, with zero-dead-zone coverage mapping, guest network isolation and centralised cloud management and control.

Structured Cabling & Switching

Neat, labelled cabling to every desk that's easy to maintain and expand.

Certified copper and fibre cabling infrastructure, fully organised server rack installations, patch panel management, and managed and unmanaged switching.

Next-Gen Firewall & Cyber Security

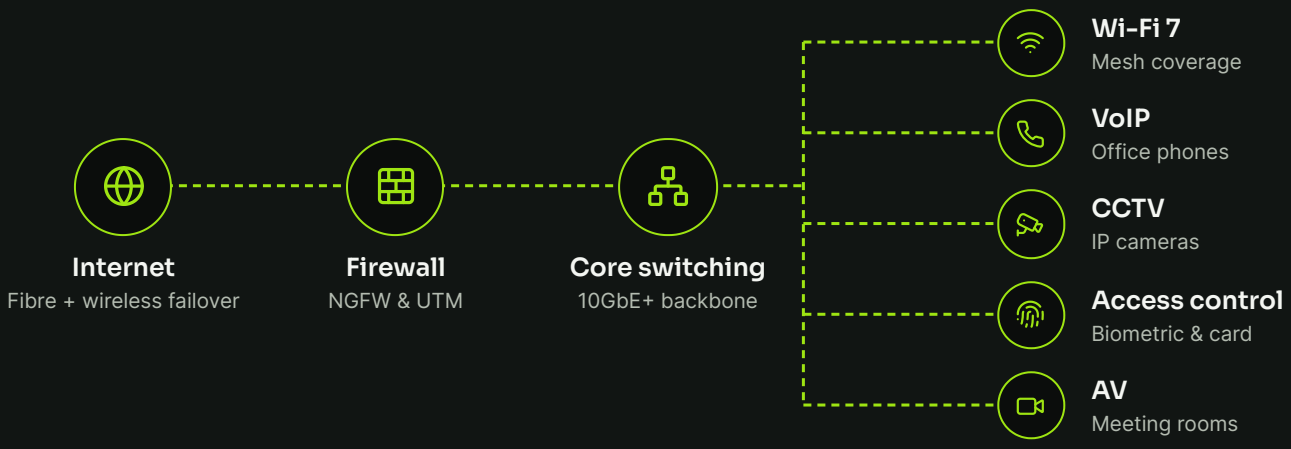

Hackers and viruses are stopped before they reach your computers.

NGFW deployment with deep packet inspection and firewall monitoring, real-time intrusion prevention (IPS), malware defence and unified threat management (UTM).

INTEGRATED TOPOLOGY BLUEPRINT

One managed network, from the fibre line to every device.

We design, install and support every layer, so there is one partner accountable for the whole chain.

ADVANCED NETWORKS, SECURITY & TELECOM

SD-WAN Multi-Site Networking

All your branches work as one network, as if they're in the same building.

Software-defined WAN connecting remote offices and branch locations to HQ, with intelligent traffic routing, latency reduction and encrypted site-to-site VPNs.

10GbE+ Backbone Switching

Large files move between computers in seconds, not minutes.

10GbE+ backbone switching, VLAN segmentation and optimised routing architectures, engineered for massive data transfers and low latency.

CCTV & IP Surveillance

See what's happening on site, day or night, from your phone.

High-definition IP surveillance with AI analytics, remote mobile viewing, night vision and centralised Network Video Recorder (NVR) storage.

Biometric & Card Access Control

Control who gets in, and keep a record of who came and went.

Biometric, card and RFID entry systems integrated with automated time-tracking software for secure, auditable facility access logs.

VoIP Telephony

Cheaper calls, and your office number can ring on your cellphone.

Crystal-clear IP voice solutions featuring automated attendants, mobile extensions, call queues and significant cost savings over traditional telco.

AV & Video Conferencing

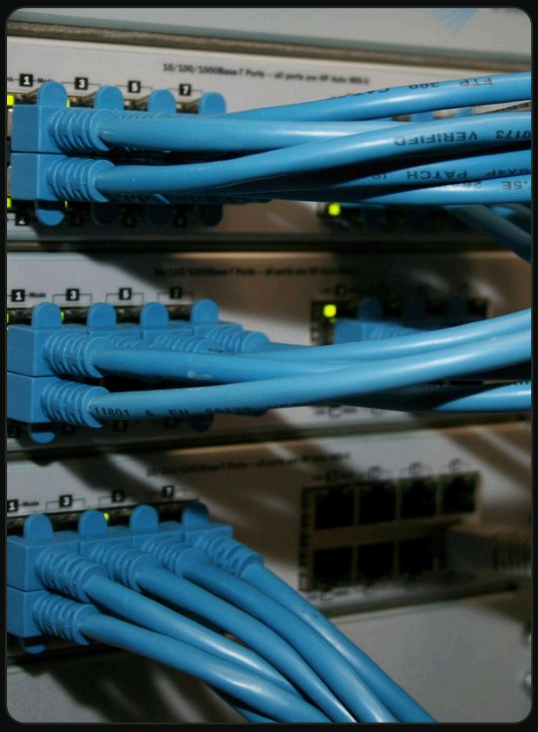

Online meetings in your boardroom that just work.

Integrated room audio and quality video systems tailored for boardrooms and huddle spaces, with native support for Microsoft Teams, Zoom and custom platforms.

DEPLOYMENTS

Whatever stage your space is at, we've got the network covered.

New builds, relocations, upgrades or ongoing support. We coordinate with your architects, electricians and ISPs so everything is live on time.

01 Building & Renovation Projects

We plan your network before the walls close up.

Turnkey planning, structured cable runs, ceiling-mount Wi-Fi placement, clean server rack integration, and site coordination with architects and electrical contractors.

02 Office Relocation

Move offices without losing days of work.

Physical server room migration, ISP circuit cutovers, low-downtime migration planning and structured cabling at the new site.

03 Infrastructure Upgrade & Hardware Refresh

Swap slow, outdated equipment for faster, safer gear.

Replacing end-of-life firewalls, switches and access points with modern multi-gigabit throughput, SD-WAN failover and zero-trust perimeter security.

04 Network Expansion

Add desks, floors or branches without starting over.

Adding extra network ports, extending Wi-Fi coverage, provisioning multi-floor backbones and linking new satellite offices.

05 Existing Network Support

One number to call when something isn't working.

A single point of contact for all your network connectivity support requirements and service agreements.

MORE FROM ELEVATION TECH: POST PRODUCTION

Post Production Infrastructure

Your editors never sit waiting for files to load or save.

High-performance infrastructure for creative teams who can't afford to wait, built for post-production performance and heavy media workflows.

- ✓ Large-scale NAS storage for heavy media files
- ✓ Ultra-fast networking for multi-user collaborative editing
- ✓ Ready for 4K workflows and large media libraries
- ✓ Shared storage for teams across multiple studios

BRANDS WE WORK WITH

Fortinet	MikroTik	QNAP	Lenovo	Microsoft Azure
Firewalls & cyber security	Routing & switching	NAS storage	Computers & servers	Cloud services

COMPLETE IT, BEYOND THE NETWORK

Managed IT Support

Like having your own IT department, without hiring one.

Managed IT services and consultancy: we assess your current and future needs, then manage your hardware, software and IT strategy as one trusted partner.

Hardware & Software

The right computers and software, chosen and set up for you.

Desktops, laptops, servers, licensed business software, endpoint security tools and productivity suites, matched to your setup, expansion or refresh.

Cloud Solutions

Work securely from anywhere, with email and files in the cloud.

Microsoft 365 and Google Workspace: email, file sharing, calendars, backup and collaboration, with setup, migrations and ongoing support.

ABOUT US

Technology that helps your business grow.

We take a consultative approach, assessing your current and future needs before we recommend a single solution.

Elevation Tech is a Cape Town technology solutions provider led by Brian d'Agnel. Our aim is simple: to help businesses succeed by applying sound technology practice and the trends that suit their growth.

BD **Brian d'Agnel**
Founder · 20+ years in technology consultancy

Value

Solutions that make sense for your budget and deliver a real return on investment.

Grow

Scalable infrastructure planned for where your business is going, not just where it is.

Knowledge

Strong partnerships with upstream vendors keep us ahead of the technology curve.

Passion

A faith-based business with a genuine passion for technology and the people who use it.
